

Earnings and Productivity Statistics in September 2014

In September 2014, the total nonagricultural payroll employment, at 7,319 thousand, decreased by 2 thousand (or 0.04%) than last month. In comparison with September 2013, payroll employees increased by 147 thousand (or 2.05%). The average employment since January 2014 was 7,255 thousand, increased by 136 thousand (or 1.91%) than the same period of last year. The average monthly hours of work in September 2014 was 178.8 hours, decreased by 2.1 hours from last month and increased by 6.9 hours from the same month of last year. Since January 2014, the average working hours was 175.6 hours, increased by 0.7 hours than the same period of last year. The average regular earnings in September 2014 was NT\$38,384, 0.25% more than last month and 2.19% more than the same month of last year. Average monthly earnings in September was NT\$44,382, which was 0.27% less than last month and 2.96% more than the same month of last year. The average regular earnings since January 2014 was NT\$38,111, which was 1.69% more than the same period of last year. The average monthly earnings since January 2014 was NT\$48,521, increased by 4.37 percent than the same period of last year.

Employees

In September 2014, the total nonagricultural payroll employment, at 7,319 thousand, decreased by 2 thousand (or 0.04%) than last month. Among all industries, the service sector had shared 55.91%. In comparison with September 2013, payroll employees increased by 147 thousand (or 2.05%). The average employment since January 2014 was 7,255 thousand, increased by 136 thousand (or 1.91%) than the same period of last year. The industrial sector increased 1.74% and the service sector increased 2.04%. Among all industries, the employees increased mostly in Manufacturing (49 thousand), followed by Wholesale and Retail Trade (26 thousand) and Accommodation and Food Service Activities (15 thousand).

Turnover Rate

The average accession rate within industry and service sectors in September 2014 came to 2.84 percent, decreased by 0.05 percent point than last month and increased by 0.17 percent than the same month of last year, while the separation rate of 2.87 percent, up by 0.20 percentage point than last month and up by 0.26 percentage than the same month of last year.

The average accession rate from January 2014 to September 2014 was 2.62 percent, up by 0.20 percent than the same period of last year. Between them, the industrial sector increased by 0.09 percentage point and the service sector increased by 0.29 percentage point. The average separation rate was 2.44%, up by 0.15 percent than the same period of last year. The industrial sector increased by 0.02 percentage point, while the service sector increased 0.25 percentage point.

Earnings

The average regular earnings per employee at the industry and service sector in September 2014 was NT\$38,384, 0.25% increasing than last month and 2.19% increasing than the same month of last year. Average monthly earnings (including regular and irregular earnings) in September was NT\$44,382. Comparing with last month and a year ago, there was 0.27% decreasing and 2.96% increasing respectively.

The average regular earnings since January 2014 was NT\$38,111, which increased 1.69% than the same period of last year and reached the highest level in record. The irregular earnings (including year-end bonuses granted in the beginning of this year, performance bonuses and overtime pay) was NT\$10,410, increased 15.50% than the same period of last year. Together with regular and irregular earnings, the average monthly earnings since January 2014 was NT\$48,521, increased by 4.37 percent than the same period of last year and reached the highest level of September in record. After deflating by the consumer price index increasing rate (1.32%), the real average earnings based on

2011 price was NT\$46,691, rose 3.02% than last year. The real regular earnings was NT\$36,673, 0.37% more than the same period of last year.

Hours of work

The average monthly hours of work for industry and service sector in September 2014 totaled to 178.8 hours, which decreased by 2.1 hours from last month and increased by 6.9 hours from the same month of last year. The average working-hour since January 2014 was 175.6 hours, increased by 0.7 hours than the same period of last year. Included in the average working-hour, the regular working hour increased by 0.5 hour while the overtime increased by 0.2 hours.

Labor Productivity and Unit Output Labor Cost

In September 2014, the manufacturing sector's labor productivity index was 103.69 (2011=100), decreased by 0.09% than last month and up by 3.79% than the same month of last year. The manufacturing unit output labor cost index was 92.82 (2011=100), down by 4.45% than last month and down by 7.87% than the same month of last year.

The average labor productivity index since January 2014 was 3.56% more than the same period of last year, while the unit output labor cost index since January 2014 was reported 0.31% decreasing.

Summary of Earnings and Productivity Statistics in Taiwan Area

Unit of compiled: DGBAS, EXECUTIVE YUAN

Date of compiled: Nov. 24, 2014

Notes: 1. Numbers in quotation are time-increased, time-decreased or percentage.

2. Monthly earnings of all employees are the total of regular (basic salary, monthly bonus, fixed subsidy and good attendance reward) and irregular (over-time, annul bonus, flexible bonus not paid by month) earnings of employees on payroll, but exclude the non-working reward such as insurance and pension.

3. Both Industry & Services and Services Sectors statistics covered Education Industry (only other education and educational support activities are included) since January 2009.

4. Due to the samples replacement of the Employees' Earnings Survey in July 2014, all preliminary data in that month were revised in this month.
