Note 1 : Under normal circumstances the item weights for CPI are annually updated based the delayed Household Expenditure consumption

**Consumer Price Index (Base Year 2021) by Item Weight, Commodity Quality and Purchase Frequency
(weight for 2024)**

Overall	Division	Group	Class	Priced Items	Weight (%) [Note 1]	Commodity Quality [Note 2]	Frequency of Purchase [Note 3]
---------	----------	-------	-------	--------------	---------------------------	----------------------------------	--------------------------------------

structure compiled by National Accounts, with 2024 weights based on the 2022's data; however 2022's consumption was greatly affected by COVID-19. With eased restriction starting 2022 Q3 and the consumption gradually normalized, it is expected that 2024's consumption structure differs than that of 2022's. The consumption structure for 2024 is based on the consumption from 2022 Q4 to 2023 Q3.

Note 2 : ND-Non-Durables, SD-Semi Durables, D-Durables, S-Services.

Note 3 : "Monthly" stands for purchase at least once per month;

"Seasonal" stands for purchase once every three-months (not including that of Monthly);

"Other" stands for purchases once longer than three months.
