

Doesn't everyone have to participate in the census? Why do I have to give census information, but my neighbor or friend in the other community don't have to take part?

The 2020 Population and Housing Census was conducted as the Register and Survey Integrated Census. Official registration files are the basis to compile the total number of resident population and basic population items. A total of 15% enumeration areas were sampled by using advanced statistical and sampling methodology. Each household and person in these areas was visited. Not only the sample was representative but manpower and cost were reduced greatly as well. Therefore, not all households and individuals were required to participate in the census.
