

**GDP: PRELIMINARY ESTIMATION FOR 2014Q2
AND OUTLOOK FOR 2014-5**

August 15, 2014 In 2014Q2, Taiwan's real gross domestic product (GDP) grew by 3.74% from the same quarter of the previous year, according to the latest preliminary estimation by DGBAS. The GDP is predicted to grow 3.41% and 3.51% in 2014 and 2015, respectively.

Preliminary Estimation of GDP in 2014Q2

Taiwan's service export gained amid the significant increase of the travel and merchanting revenues in 2014Q2. Combining commodity trade and the domestic demand, Taiwan's GDP is estimated to increase by 3.74%, compared to the same quarter of 2013. In the meantime, the real GDP growth rate of 2014Q1 is revised to 3.24% (formerly 3.14%).

Forecast for 2014

Supported by the increasing worldwide demand of the semiconductors, electronic components and machinery, the external sector is expected to advance in the second half of 2014. Coupling with the domestic demand, Taiwan's real GDP is predicted to grow 3.41% in the whole 2014. CPI will rise by 1.64%.

Outlook for 2015

The growth of world economy, according to the latest global economic forecasts, is anticipated to move higher in 2015 than the previous year, and will sustain Taiwan's export growing. Combining with the domestic demand, real GDP will grow by 3.51% in 2015. CPI will increase by 1.46%.

Explanation : 1. (p) indicates preliminary version, (f) indicates forecast, (r) indicates revised version. These marks mean the same in all tables.

2. The sum of the decomposed items might not be equal to the total due to the rounding of decimals.

3. yoy (year on year) means the growth rates to the correspondent quarter of previous year, saqr (seasonally adjusted quarterly growth rate) means the growth rate of seasonally adjusted value compared to the previous quarter, saar (seasonally adjusted annualized rate) means the annualized growth rate of seasonally adjusted value compared to the previous quarter ; $saar=(1+saqr)^4-1$.

Note : (1) Real estate consists of real estate development, operation and related activities, dwelling services are also included. The dwelling services(including those rental and owner-occupied imputed) accounted for about 85% of total real estate.

(2) Includes accommodation and food services, professional, scientific and technical services, support services, human health and social work services, arts, entertainment and recreation, other services, import duties and value-added tax.

Explanation : 1.Statistical Discrepancy is not included, therefore sum of contributions from agriculture, industry and service is not necessarily equal to the economic growth rate.

2.Contributions of industry X at time T= $(r_{xT}-r_{xT-1})/rGDP_T \times 100\%$, where r_x : real value added of industry X, $rGDP$: real GDP, T and t represents reference period and the corresponding period of previous year.

Explanation : Contributions of component X at time T= $(rx_t-rx_{t-1})/rGDP_t \times 100\%$, where rx : real value of component X, $rGDP$: real GDP, T and t represents reference period and the corresponding period of previous year.

Explanation : 1. Numbers in quotation are time-increased, time-decreased or percentage.

2. Monthly earnings of all employees are the total of regular (basic salary, monthly bonus, fixed subsidy and good attendance reward) and irregular (over-time, annual bonus, flexible bonus not paid by month) earnings of employees on payroll, but exclude the non-working reward such as insurance and pension.

3. Both Industry & Services and Services Sectors statistics covered Education Industry (only other education and educational support activities are included) since January 2009.

Table 14 Major Figures of Family Income and Expenditure (1/2)

2013	6.08	0.336	4.08	0.288	3.95	0.273

Explanation : 1. Per capita income is calculated as the ratio of per capita income of first quintile to per capita income of fifth quintile. All the population ranked in ascending order of per capita income is divided in to five quintiles. Per capita income is calculated as household income divided by household size(or the square root of household size) .

2. The figures of income inequality measured by per capita income is lower than per household income.

Table 15 The Change of Disposable Income per Household Occurred by Current Transfers between Households and Government

Unit:NT\$,%

Year	Household Income Without Current Transfer From Government		Ratio	Household Current Transfer Income From Government		Household Income Including Current Transefer Income From Government		Ratio	Household With Current Transfers Income to Government		Disposable Income		Ratio	Ratio Difference

Explanation: The higher Gini's concentration coefficient, the more serious the inequality of income distribution.

Note: The data presents official releases of above countries. The comparison should be made cautiously for the difference of income definition. For example, Taiwan is disposable income from all households. U.S. (a) is income from all households after accounting for government cash benefits and taxes, the year of 2007 and before is including capital gains and non-cash transfers, the years of 2008 and 2009 is excluding capital gains. U.S. (b) is income before tax including government cash transfers, but excluding capital gains and non-cash transfers. Japan (a) is yearly income(before tax), and not incorporated with farm households till 1999, not with single households till 2002, Japan (b) is per capita disposable income for all households. South Korea (a) is per capita disposable income for the urban area households (1-person households and farm households are excluded),South Korea(b) is per capita disposable income for all households. Singapore(a) for all households, Singapore(b) and (c) for employed households, all including income from work, (a) and (b) are before accounting for government benefits and taxes, hence having higher ratios and coefficient, (c) is after that. The data of Hong Kong compute on post-tax household income and publish the report every five years.

Source: Japan: (a) Family income and expenditure survey, (b) National Survey of Family Income and Expenditure. South Korea: Annual Report on the Household Income and Expenditure Survey. U.S.: is from Current Population Survey Annual Social and Economic Supplements(CPS ASEC), (a) "Effects of Taxes and Transfers on Income and Poverty", (b) "Income, Poverty, and Health Insurance Coverage in the United States" Singapore: (a) General Household Survey, (b)(c) Data for the year of 2000 and 2010 is from the Census of Population; for the year of 2005 is from General Household Survey; for the year of 2001,2002,2003,2004,2006,2007,2008,2009,2011 and 2012 is from Labour Force Survey. Hong Kong: 2011 Population By-census, Thematic Report: Household Income Distribution in HK.

Explanation : pin ≙ 3.31 square meters.

Note : ① Concerning ownership of the house, before 2010, the term "self-owned" means owned by household members and their lineal relatives. In 2010, the meaning is amended to owned by household members who usually live in this house in accordance with the definition of 2011 Population and Housing Census.

Table 18 Government Social Transfers In Kind Effect on Income Distribution, by Income Quintile

Year	Disposable income				Government social transfers in kind			Household income after government social transfers in kind				Government social transfers in kind effect A-B
	Average household income (NT\$)			Ratio of 1st quintile to 5th quintile (A)	Average household income (NT\$)			Average household income (NT\$)			Ratio of 1st quintile to 5th quintile (B)	
	All households	1st quintile	5th quintile		All households	1st quintile	5th quintile	All households	1st quintile	5th quintile
